## SLD Parent Questionnaires - Summer 21 - Comments

The difference in my son's speech is amazing since being at Wincheap and I can't fault them. Amazing staff! Thank you.

We are very happy with how much our daughter has come on since being part of the speech and language department.

Our 8 year old has been at Wincheap for 4 years now and he is about to transfer to a school which will now meet his needs which have now taken more of a priority than his severe speech and language disorder. Wincheap have dealt with his very challenging behaviour in a very positive way and allowed him to complete a full year before transferring to his new school. This will make an enormous difference to him. They have focussed on maintaining a safe environment for him and other children in his class and that has quite often been more of a priority than his learning which is why he has needed a specialist school. He has had an excellent team working with him and he has still made some progress compared to the previous year. He has really enjoyed school and through he knows he will miss Wincheap, he knows that he, like every child, has to move on. His time at Wincheap has been very happy and full of memories. Thank you.

A has done amazing in the speech and language department and I cannot thank them enough. Mrs Wallace has shown so much support for Alfie and myself. All the teachers in the department are amazing, kind and caring.

Since my daughter has started to attend Wincheap she is a different child. She is very happy going to school and she loves her teacher and class. If only Wincheap was a secondary school. F would love that.

Our experience of our time with the speech and language department is a whole family one. The specific learning difficulties our son has are well understood and well managed, with a strong ethos of community, support and future independent functionality for each child the goal. Pragmatic, experienced, skilled and cheerful, the staff balance the unique needs and education with the individual care of each student beautifully. Their focus on wellbeing is refreshing and demonstrates their expertise and their love for the children.

S always speaks very positively about the speech and language department.

The speech therapists are extremely knowledgeable, supportive and helpful, however contact is not as prevalent as it could be. The teachers and the teaching assistants have really taken the time to get to know my child as an individual and have been extremely accommodating in supporting him. This in turn, has resulted in marvelous results educationally, socially and emotionally. We are thrilled with the progress that has been made this year.
